

Greater and Higher!!

Sabrina Griffin

Texas Southern University, Graduating Fall 2019, GPA 3.91

For Sabrina Griffin, there is no stopping; there is no challenge too great; there is no problem that does not have a solution. There simply is no obstacle that Sabrina can't overcome, especially when she makes up her mind and focuses as to how far and high, she wants to go in life. The possibilities are endless for the youngest sibling of four children to an ex-military postal worker father and mother who was a daycare provider. In December 2019, Sabrina will be the first in her family to graduate college.

Working over forty hours a week during her entire college career while maintaining a 3.91 GPA took nothing less than determination. A member of the Honors College and National Association of Collegiate Scholars, her reputation around campus for her academic excellence and willingness to help her fellow classmates with tutoring incoming freshmen and sophomores alike, were the sole reasons for her nomination to receive and was ultimately awarded the FEI Houston Scholarship for Texas Southern University.

Now, as she prepares to receive her BBA in accounting from Texas Southern University in December 2019, her dedication and never-ending preparation to her chosen field and course of study is demonstrated as she looks forward to attending graduate school while she considers an extended job offer at Hilcorp Energy Company where she presently is a CoOp student intern in the Internal Financial Reporting Department. "I currently work on the 11th floor of Hilcorp. My goal is to work on the 25th floor, where the executives are.", There's no doubt she's headed in that direction, if not higher.

Sabrina says:

"I know that a major challenge I face professionally is the school where I received my degree from. Because TSU is known to be a predominantly African American school, I fear there is a stigma that is associated with that fact, but I love my school! I worked hard for my GPA! FEI not only recognized TSU (somewhat of an underdog) for the Scholarship but ME, Sabrina Griffin; not only for all the work I did but the future they see in me."
